To whom it may concern

Re Myrtha Pool

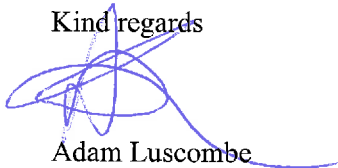

I have worked with Myrtha Pool's for well over 13 years at two State based facilities. These being the Melbourne Sports and Aquatic Centre and now the *South Australian Aquatic and Leisure Centre (SAALC)*. In both facilities it has been observed that the construction methods, quality of workmanship, attention to detail, timeline and task management and customer service has been exemplary in contraction and post commissioning.

In the case of the *SAALC* all pools are Myrtha. This includes two, 10 lanes 50-meter pools, a Diving well and Water polo pool as well a dedicated indoor lap pool (8x25m), a rehabilitation pool and a 150 square meter Leisure pool with ancillary features. These facilities are;

- The home of Swimming Australia's major Events – including three Olympic Trials
- The home of the South Australian Institute of Sport,
- The venue of choice for 3 World Championships that have been run from this venue,
- The training environment for several Olympic Gold medallists and a few Olympians,
- A massive community programming template, supported by quality pools and equipment, that meets the complex demands of an elite environment and community Centre,
- One of Australia's largest Learn to Swim schools and
- The pride of its community and South Australia with just over 1.1 million visits annually.

South Australia is a small state, due to its population of 1.2 million. Hence our State must choose investment, equipment and infrastructure suppliers wisely. We believe that Myrtha's traits, mentioned above, 'after service care and support' to be the items that support the consideration of installing a Myrtha pool or pools and its service regime. I highly recommend Myrtha.

Kind regards
